PART 3 - EXECUTION

3.1 INSPECTION OF SURFACES

- A. Roofing contractor shall be responsible for preparing an adequate substrate to receive insulation.
 - 1. Verify that work, which penetrates roof deck, has been completed.
 - 2. Verify that wood nailers are properly and securely installed.
 - 3. Examine surfaces for defects, rough spots, ridges, depressions, foreign material, moisture, and unevenness.
 - 4. Do not proceed until defects are corrected.
 - 5. Do not apply insulation until substrate is sufficiently dry.
 - 6. Broom clean substrate immediately prior to application.
 - 7. Use additional insulation to fill depressions and low spots that would otherwise cause ponding water.
 - 8. Verify that temporary roof has been completed.

3.2 INSTALLATION

- A. Attachment with Insulation Adhesive
 - 1. On a prepared deck, approved by the manufacturer, install 3" insulation boards adhered to the deck in ribbons of adhesive at the rate to obtain an FM 1-90. Install insulation boards to the deck in ribbons of adhesive at the rate of one [1] gallon per 150 square feet. Do not allow the adhesive to skin over. Briefly step each board into place to ensure contact with the adhesive.
 - 2. Applying adhesive directly to the substrate in a ribbon pattern in 1/2" (1.27 cm) to 3/4" (1.91 cm) beads, using either the pail or an automatic applicator, placed every one 1' foot (0.30 m) on center to achieve proper coverage rates. Immediately place - do not slide - the insulation boards into the wet adhesive. Do not allow the adhesive to skin over. Briefly step each board into place to ensure contact with the adhesive.
 - 3. Approved recovery board 1/2" thickness shall be installed over base insulation in insulation adhesive at the rate of one [1] gallon per 150 square feet. Do not allow the adhesive to skin over. Briefly step each board into place to ensure contact with the adhesive.
 - 4. All boards shall be cut and fitted where the roof deck intersects a vertical surface. The boards shall be cut to fit a minimum of 1/4" away from the vertical surface.

3.3 CLEANING

- A. Remove debris and cartons from roof deck. Leave insulation clean and dry, ready to receive roofing membrane.

PART IV - MEASUREMENT AND PAYMENT

4.1 MEASUREMENT

- A. Roofing insulation including both the 3" iso layer and the ½" protection board layer plus all associated adhesives, roofing plys, cleaning, preparation and fastening systems shall be measured on a square foot basis complete and in place. All associated costs in connection with roofing insulation shall be considered incidental to that pay item.

4.2 PAYMENT

- B. Roofing insulation shall be made at the Contract Unit Price per square foot.
